Professional Summary

Highly motivated Front-End Developer with proven experience in building responsive, user-centric web applications using JavaScript, React, and Tailwind CSS. Combines hands-on development expertise with a passion for mentorship, demonstrated through a role as a Lecturer Assistant at 10x Academy. A resilient and solution-oriented team player, adept at translating complex problems into clean, efficient code. Eager to contribute to a collaborative team, drive project success, and continuously learn new technologies like TypeScript and AI-driven tools.

Technical Skills

Languages:

HTML5, CSS3, JavaScript (ES6+), TypeScript (learning), Sass

Frameworks & Libraries:

React, Tailwind CSS

Tools & Methodologies:

Git, GitHub, VS Code, Jira, ClickUp, Miro, REST APIs, Agile/Scrum, Responsive Design

Professional Experience

Lecturer Assistant, Front-End Development

Jan 2025 – Present

10x Academy | Batumi, Georgia

- Mentored and supported students in mastering core web technologies, including HTML, CSS, JavaScript, and React, fostering a positive and encouraging learning environment.
- Led technical code reviews and practical workshops, providing constructive feedback to improve code quality, structure, and performance.
- Developed and delivered supplementary learning materials to demystify complex topics and accelerate student understanding.
- Guided beginners with patience and clarity, acting as a key motivational figure within the cohort.

Freelance Front-End Developer

May 2024 – Present

Remote

- Engineered and launched multiple responsive websites and interactive web components for various clients, ensuring cross-browser compatibility and optimal performance.
- Collaborated closely with designers and back-end developers within an Agile framework, using tools like Jira and Miro for seamless project management.
- Implemented REST API integrations to fetch, display, and manage dynamic data, creating fluid user experiences.
- Ensured high-quality code standards and project ownership from conception to deployment.

Projects

CarFix - Car Diagnostic Web Application

[GitHub](#)

A smart diagnostic platform that connects users with vehicle error code data to provide clear explanations and potential solutions.

- Architected the front-end using React and managed application state for a seamless user flow.
- Styled the application with Tailwind CSS, creating a modern and fully responsive interface.
- Integrated a back-end REST API to fetch and display diagnostic information dynamically.
- Technologies: React, Tailwind CSS, REST APIs

Animated Weather Forecast App

[GitHub](#)

A responsive weather application that provides real-time forecasts with dynamic UI elements based on the conditions.

- Developed entirely with vanilla JavaScript to handle API calls and manipulate the DOM.
- Fetched and displayed data from the OpenWeatherMap API, including temperature, visuals, sunrise/sunset times, and unit conversion.
- Designed and implemented custom CSS animations to reflect current weather conditions.
- Technologies: HTML5, CSS3, JavaScript (ES6+), REST API

Education

Front-End Development Certificate

2024 – 2025

10x Academy | Batumi, Georgia

- Completed an intensive, project-based curriculum covering modern front-end technologies and best practices.

Languages

- Georgian: Native
- English: Intermediate
- Russian: Professional Working Proficiency
- Turkish: B1 (Intermediate)
